Thanks for providing this information. Also, congratulations on your decision to retire.

The permit was coded in October 2007 (I know because I coded it). The information was not entered into ICIS until 2009. There is a difference.

I am glad to see that there is data from 2007 in the spreadsheet.

Cindi,

AKG315000

**COOK INLET GENERAL PERMIT** 

Issue Date: 06/14/2007

Permit Type: NPDES Master General Permit

Effective Date: 07/01/2007 Expiration Date: 06/30/2012

You were requesting five years of data; however, this permit and associated NOIs were not coded until sometime in mid 2009.

The permittees were reluctant or I should say refused to resubmit old data previously sent on their own DMR format.

This spreadsheet has a master page (Cook Inlet AKG315000) and the sheets with individual permit tabs can be sorted based on the page headings.
